

WEBINAR

Performance-based funding for rural water in Africa

How might we fund reliable rural water services at scale to leave no one behind?

In 2018, five service providers collectively maintained over 2800 rural waterpoints serving an estimated one million people in Burkina Faso, the Central African Republic, Kenya, and Uganda.

Join us to review findings from a new report assessing their performance and to discuss implications for funding reliable rural services to achieve SDG 6.1.

Speakers

- Dr Duncan McNicholl, Uptime
- Dr Alex Money, University of Oxford

Panelists

- Dr Ulrike Pokorski Da Cunha, Head of Sustainable Water Policy Programme, GIZ
- Thierry Barbotte, Managing Director, UDUMA
